Contributions to the Project:

During this sprint, I focused primarily on the frontend development of our project. My key contributions include:

1. Frontend Development:

- Designed and implemented various frontend pages using HTML, CSS, and JavaScript. This included creating responsive layouts and ensuring a user-friendly interface.

2. Integration with Backend:

- Collaborated with the backend team to connect the frontend pages to the backend routes using Flask. I assisted in setting up API calls and managing data flow between the frontend and backend.

3. Collaboration:

- Worked closely with team members to ensure that the frontend components were in alignment with the backend functionalities. Participated in team meetings to discuss progress and address any issues.

4. Technologies Used:

- Utilized HTML, CSS, JavaScript, and Flask throughout the development process.

Overall, my contributions helped in creating a cohesive and functional application that enhances the user experience.
