

Daniel Secelean 40227919 SOEN341 Sprint 3

Worked on backend:

Rewrote authentication routes using tokens. Added blacklist table in the database so that when a user is logging out their token is no longer viable. **5 hours**

Changed team routes to require tokens and added restrictions as to which type of user can access which routes. **3 hours**

Helped teammates with various questions about docker. **30 minutes**

Fixed GitHub issues when a teammate accidentally pushed his code directly on the main branch. **1 hour**

Various meetings **2 hours**
