Meeting 2)
Date: November 7th, 2024   **Duration:** 1 hour

Attendees: Dara Dadgar, Oren Argot, Mathieu Phan, Marchelino Hachbi, Brandon Phelps, Daniel Secelean

Agenda)

- Follow up on the implementation:
  - Did a review on what is done and what is not and went through the assigned tasks to track the incomplete tasks and plan the upcoming days.
    - Decision:
      - The tasks were tagged with complete/incomplete tags to have a better view of what needs to be completed for the sprint submission.
      - The remaining incomplete tasks have been re-assigned to team members based on their availabilities in the upcoming days.
- Discussed unit-testing Integration:
  - Discussed different techniques for integrating the unit tests within the project (Github workflow).
    - Decision:
      - The product owner will be implementing the unit tests on GitHub actions while the rest of the front-end team will complete the remaining pages.
- Discussed cloud integration for the backend flask database:
  - Started the discussion on integrating the backend on a cloud to make it more accessible and easy to use/manage.
    - Decision:
      - Since the backend routes are mostly complete, the cloud integration will begin shortly and as new routes are needed, the backend will be modified to accommodate the new incoming changes.

Next meeting: Finalizing the submission deliverables (documentation + development). Test the system unit tests integrated for sprint 3. Ensuring all workflows run properly and report the right information.
